

Detail Product of PT Listrikum

Lithium Battery

Spesification

INTRODUCTION All lithium-ion batteries applied in various segments are being produced by world's best manufacturing and technology. We present all kinds of optimized solutions to meet customer's needs and offer differentiated values to our users with higher performance, longer life and more reliable safety. **SPECIFICATION** Product features: - Compared with VRLA battery with the same capacity, low load-bearing requirements save installation space - The battery pack is equipped with a BMS management system, which is rich in functions and can realize convenient battery management by cooperating with the upper computer software - The charging and discharging parameters need not be adjusted to match the original switching power supply system in the machine room - Compatible with multiple communication modes of R232, RS485 and SNMP - A variety of installation and use modes are designed, which can meet the requirements of diversified application scenarios, such as standard cabinet, wall hanging, pole holding, landing, strap, lever box, etc - Multiple sets of parallel connection can be used, and can be equipped with parallel hub and supporting cables, which is easy to connect and can solve the discharge unbalance problem caused by multiple sets of parallel connection.
